

ExcellentLife

In today's society there is an increasing demand for data-driven E-health solutions. This makes it easier for an employer to do more for its employees so that they can continue to perform their work in a sustainable manner. By facilitating tailored solutions for "daily" problems and by offering employees the opportunity to contact your selected professionals at anytime and anywhere (when necessary), a culture is created in which everyone makes and keeps themselves and each other healthy.

When health is affordable, sick leave decreases

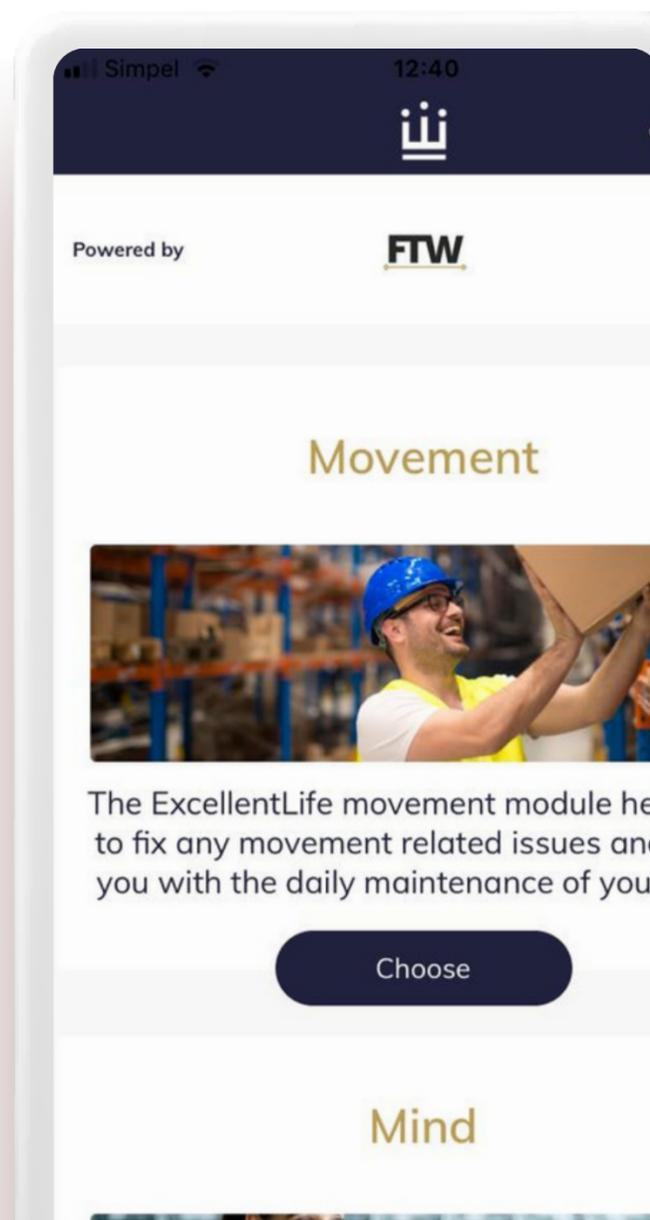

ExcellentLife gives you **solutions** for your "daily" problems and (when necessary) the possibility to contact the right (care)professional at any time or place.

In addition to the **accessible** way in which the ExcellentLife platform is set up, we believe that everyone should be given **the same opportunities with regard to health**. That is why we offer our software at a rate that is affordable for everyone, **only €1,- p.p.**

We at ExcellentLife believe that everyone is able to make or keep themselves healthy, when this is offered in an accessible, cheap and fast way.

After all, everyone has the right to "**Get better at feeling good**", the right to an ExcellentLife.

With ExcellentLife, your employee can easily find **the right solution** at any time of the day – simply on his/her smartphone.

In addition, the company can easily gain insight into the human factor within its organisation from its own backoffice.

Low costs, little time, fast results and a lot of insight. Decide for yourself how you design sustainable employability

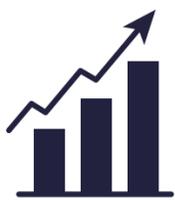

Why ExcellentLife?

Prevent absenteeism

Remove barriers and give your employees tailor-made solutions without intervention, while keeping the overview

Data driven

The data from using the app can be used to remove bottlenecks or make improvements

Your own health market

Every employee can use and find every (health) solution you offer as a company. This ensures autonomy of health for every employee within the organisation.

Insight into complaints and trends

The backoffice provides 24/7 insight into current trends and complaints. In addition, you can supplement this with your own questions from the research module

Reach everyone

With this platform it's possible to anonymously offer all employees sustainable employability when they want/need it

Free choice in professional/partner behind the button

Put the professionals or programs of your choice behind the button
